

The opportunity to support your customer finance needs is greatly appreciated. We know your time is best served and valued when focusing on sales growth.

North Star Funding has been serving businesses and vendors since 1995 and has a nationwide reach in all industries and sectors of the market. We utilize our VendorSecure™ program to compliment your current sales process while taking on the burden and busy work required when securing financing for your customers. This way your sales reps can stay focused on sales. By working within your sales process we can help prequalify customers so your sales team knows what to expect when dealing with credit worthiness.

The objective is to present an ongoing resource using our experience and knowledge of the ever changing vendor leasing community by presenting the best options currently available. Ask us about our VendorSecure™ Quoter that can be customized with your logo and products. Our Quoter will automatically calculate a variety of options for monthly payments enabling reps to sell payment instead of price.

On behalf of North Star Funding we look forward to working with you and look forward to this being the initial steps in supporting the sales goals of Sonic.
